Books

[More about books](#)

Browser:

The screenshot shows the 'Access Anesthesiology' website interface. At the top, there is a navigation bar with the logo and menu items: 'Review Questions', 'Cases', 'Video & Audio', 'Study Tools', and 'Books' (highlighted with a red box). Below the navigation bar, a red banner displays 'Welcome, Laurent!' and 'Access Provided by: Mc Graw Hill'. The main content area is titled 'Books' and is divided into two columns. The left column contains a 'Library' sidebar with a list of categories: Anesthesiology, Basic Science, Board Review, Clinical Science, Clinical Subspecialties, Critical Care, Organ Based, Special Problems, and Updates. The right column is titled 'Textbooks' and features a 'Tools' dropdown, 'CME Eligible' button, and 'Grid'/'List' view options. Two textbook covers are displayed: 'Anesthesiology, 3e' by David E. Longnecker et al., and 'Morgan & Mikhail's Clinical Anesthesiology, 7e' by John F. Butterworth IV et al.

App:

The screenshot shows the mobile app dashboard. At the top, there is a 'Dashboard' header with a user profile icon. Below the header, there is a 'Recommended Readings' section with two cards: 'AccessMedicine' (curated by Access) and 'AccessPharmacy' (curated by Access). Below this, there is a 'New on AccessSurgery' section featuring a book cover for 'Handbook of Minimally Invasive Colorectal Surgery' with an 'Explore book' button. At the bottom, there is a 'Popular book chapters' section. The app's bottom navigation bar includes icons for 'Dashboard', 'Search', 'DDx', and 'Library'.

[Return to Table of Contents](#)

Updates

[More about updates](#)

Browser:

The screenshot shows the AccessCardiology website interface. At the top, there is a navigation bar with the logo and several menu items: Review Questions, Cases, Video & Audio, Study Tools, Books, and More. Below the navigation bar is a Library section with a grid of categories: Cardiac Monitoring, Echocardiography, Imaging, View All, Cardiovascular Medicine, Electrocardiography, Interventional Cardiology, Congenital Heart Disease, Electrophysiology, Nuclear Cardiology, Critical Care, Graduate Medical Education, and Vascular Medicine. On the right side, a dropdown menu for 'Books' is open, showing 'Updates' and 'Hurst's the Heart Updates' with a 'View All' link. In the main content area, a sidebar on the left has 'Updates' selected. The main content area displays a list of updates, each with a date (May 22, 2024), a title, and authors. The updates listed are: 1. 'A Double-Blind, Randomized Placebo-Procedure-Controlled Trial of an Interatrial Shunt in Patients with HFrEF and HFpEF - RELIEVE-HF' by Lindsey R. Mitrani, Anu Lala. 2. 'PREVENT Trial: Impact of Percutaneous Coronary Intervention in Patients with Vulnerable Non-Obstructive Coronary Plaques' by Kyle F. Nelson, Gina LaRocca. 3. 'Phase 2 KARDIA-2 Trial' by Stephanie Jou, Jeffrey I. Mechanick. 4. 'ORBITA-COSMIC: Coronary Sinus Reducer for the Treatment of Refractory Angina' by Sean R. Mendez, Gregory Serrao.

App:

The screenshot shows the mobile app dashboard. At the top, there is a 'Dashboard' header with a user profile icon. Below the header, there is a section titled 'New on AccessCardiology'. In this section, there is a book cover for 'DEVICES IN CARDIAC CRITICAL CARE' by Sean R. Mendez, Gregory Serrao, and Mohamed Abd. To the right of the book cover, there is a title 'Devices in Cardiac Critical Care' and a button labeled 'Explore book'.

Quick Reference

Browser:

The screenshot shows the Access Medicine website interface. At the top, there is a navigation bar with the Access Medicine logo and several menu items: Review Questions, Cases, Video & Audio, Study Tools, Books, and a 'More' dropdown menu. Below the navigation bar, a dark blue header contains the text 'Welcome, Lauren!' and 'Access Provided by: McGraw Hill'. The main content area is titled 'Hospital Corner' and includes a sidebar menu with options like Books, Board Review, Cases, Harrison's Podclass, Infographics, Quick Reference (highlighted with a red box), and Procedures. The main content area features a 'Quick Reference' section with three cards: 'QUICK Medical Diagnosis & Treatment LANGE', 'Diagnostic Tests', and '2 Minute Medicine'. Each card includes a title, authors, and a brief description.

App:

Search any topic and filter by “Quick Reference.”

The screenshot shows the app's 'Filter results' screen. At the top, there are 'Cancel' and 'Filter results' buttons. Below this is a list of content types with corresponding icons: Audio/Video, Book, Book chapter, Case, Chapter section, Image/Figure, Infographic, and Quick reference. The 'Quick reference' option is selected, indicated by a checkmark. At the bottom, there are two buttons: 'Clear All' and 'Apply Filters'.

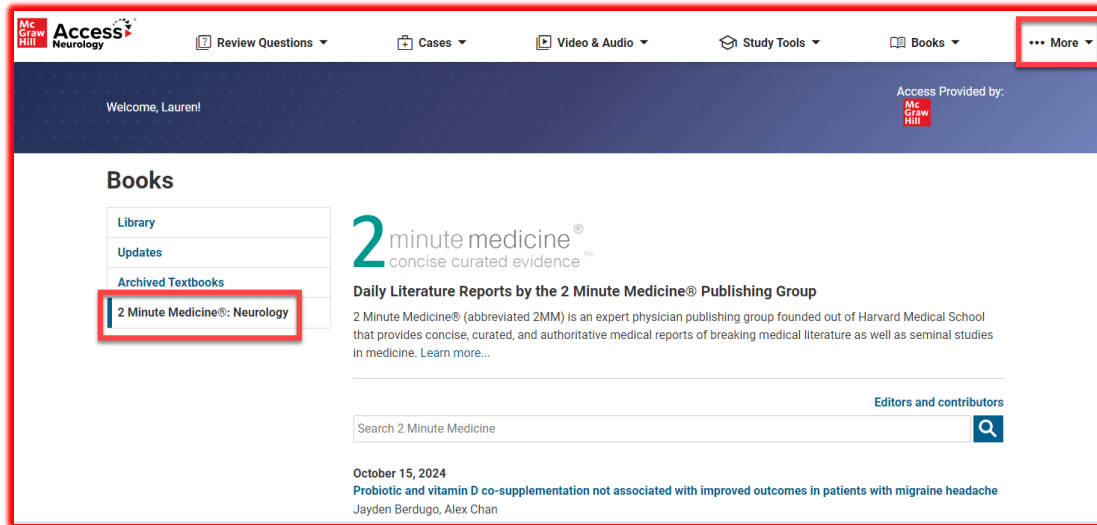

[Return to Table of Contents](#)

2 Minute Medicine®

Concise and curated reviews and summaries of new medical studies. Studies are rated for the appraisal of evidence-based medicine.

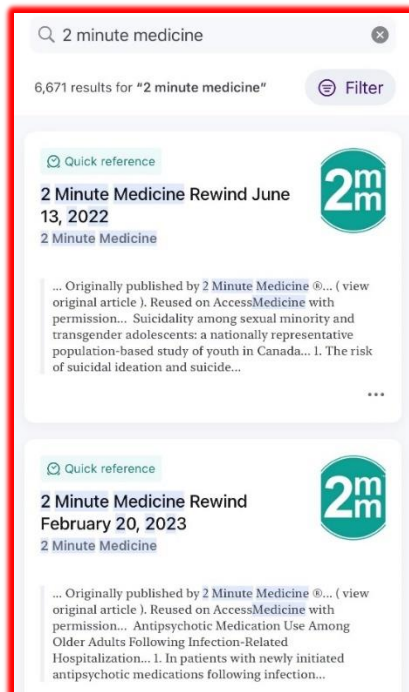

[More about 2 Minute Medicine](#)

Browser:

The screenshot shows the AccessMedicine website interface. At the top, there is a navigation bar with the AccessMedicine logo and several menu items: Review Questions, Cases, Video & Audio, Study Tools, Books, and a More dropdown menu. Below the navigation bar, a welcome message "Welcome, Lauren!" is displayed on the left, and "Access Provided by: McGraw Hill" is on the right. The main content area is titled "Books" and features a sidebar with a "Library" section containing "Updates" and "Archived Textbooks". The "2 Minute Medicine®: Neurology" item is highlighted in the sidebar. The main content area displays the "2 minute medicine®" logo with the tagline "concise curated evidence™". Below the logo, it says "Daily Literature Reports by the 2 Minute Medicine® Publishing Group" and provides a brief description of the service. A search bar for "Search 2 Minute Medicine" is located below the description. At the bottom, a date "October 15, 2024" and a headline "Probiotic and vitamin D co-supplementation not associated with improved outcomes in patients with migraine headache" by Jayden Berdugo and Alex Chan are visible.

App:

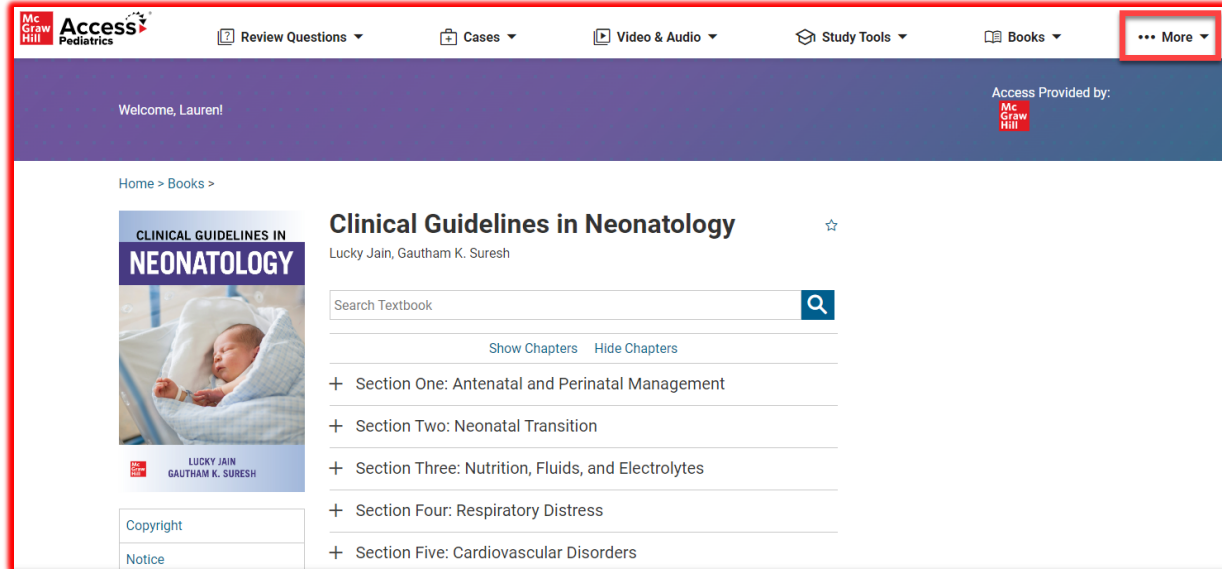

The screenshot shows the 2 Minute Medicine mobile app interface. At the top, there is a search bar with the text "2 minute medicine" and a close button. Below the search bar, it displays "6,671 results for '2 minute medicine'" and a "Filter" button. The main content area shows two search results. Each result includes a "Quick reference" icon, the "2 Minute Medicine Rewind" title, the date, and the "2 Minute Medicine" logo. The first result is dated "June 13, 2022" and the second is dated "February 20, 2023". Below each result, there is a snippet of text starting with "... Originally published by 2 Minute Medicine ®... (view original article). Reused on AccessMedicine with permission...".

Guidelines

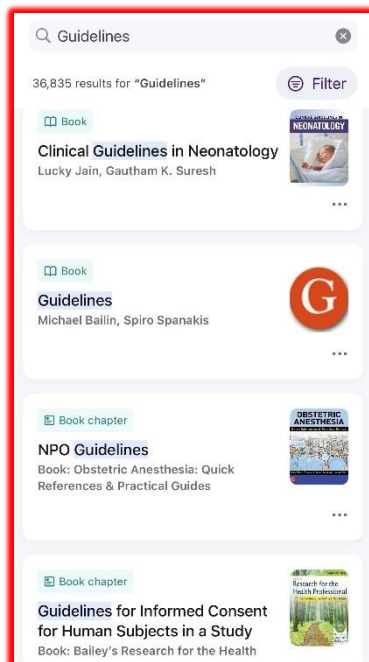

Guidelines that assist in disease screening, prevention, and management by providing succinct digest versions of longer original guidelines.

Browser:

The screenshot shows the McGraw Hill Access Pediatrics website. The top navigation bar includes links for Review Questions, Cases, Video & Audio, Study Tools, Books, and a More menu. A user is logged in as Lauren. The main content area displays the book 'Clinical Guidelines in Neonatology' by Lucky Jain and Gautham K. Suresh. The book cover features a newborn baby. Below the cover, there is a search bar and a list of chapters: Section One: Antenatal and Perinatal Management, Section Two: Neonatal Transition, Section Three: Nutrition, Fluids, and Electrolytes, Section Four: Respiratory Distress, and Section Five: Cardiovascular Disorders. The copyright and notice information is visible at the bottom left of the book details.

App:

The screenshot shows a mobile app search results page for 'Guidelines'. The search bar at the top shows 'Guidelines' and 36,835 results. The results list includes: 'Clinical Guidelines in Neonatology' by Lucky Jain, Gautham K. Suresh; 'Guidelines' by Michael Ballin, Spiro Spanakis; 'NPO Guidelines' (Book chapter) from 'Obstetric Anesthesia: Quick References & Practical Guides'; and 'Guidelines for Informed Consent for Human Subjects in a Study' (Book chapter) from 'Bailey's Research for the Health'.

Quick Dx & Rx

A collection of concise evidence-based outlines of conditions and disorders most often encountered in medical practice – perfect for high-yield review or for quick reference in the clinical setting

Browser:

The screenshot shows the web interface for 'Quick Dx & Rx: Cardiology' on the Access Cardiology platform. The top navigation bar includes 'Review Questions', 'Cases', 'Video & Audio', 'Study Tools', 'Books', and a 'More' dropdown menu. The page title is 'Quick Dx & Rx: Cardiology' by Michael H. Crawford, Mandar Aras, and José M. Sanchez. Below the title is a search bar and an alphabetical index (A-Z). The index lists various conditions such as 'Abdominal Aortic Aneurysm', 'Athlete's Heart', 'Atrial Fibrillation', 'Atrial Flutter', 'Atrial Septal Defect (ASD)', 'Atrial Tachycardia, Automatic (Ectopic)', 'Atriofascicular Tachycardia (Mahaim Tachycardia)', 'Angina Pectoris, Unstable', 'Ankylosing Spondylitis and the Heart', 'Adrenal Insufficiency and the Heart', 'AIDS and the Heart', 'Acromegaly and the Heart', and 'Angiography and the Heart'. A book cover for 'QUICK Dx & Rx CARDIOLOGY' is visible on the left side of the page.

App:

The screenshot shows the mobile app interface for 'Quick Dx & Rx: Cardiology'. The search bar contains 'Quick dx' and shows '5,410 results for "Quick dx"'. A 'Filter' button is visible. The results list includes: 1) 'Quick Dx & Rx: Cardiology' (Book) by Michael H. Crawford, Mandar Aras, and José M. Sanchez; 2) 'Atriofascicular Tachycardia (Mahaim Tachycardia)' (Book chapter) from the book 'Quick Dx & Rx: Cardiology'; and 3) 'Cardiomyopathy, Tachycardia Induced' (Book chapter) from the book 'Quick Dx & Rx: Cardiology'. Each result includes a small book cover icon and a three-dot menu.

[Return to Table of Contents](#)

Quick Answers

Browser:

The screenshot shows the AccessPhysiotherapy website interface. At the top, there is a navigation bar with the 'Books' menu highlighted. Below the navigation bar, a blue header contains the user's name 'Welcome, Laurent!' and 'Access Provided by: McGraw Hill'. The main content area displays the title 'Quick Answers: Physiotherapy' by Eric Shamus. A search bar is present, and below it is an alphabetical index from A to V. A table of contents lists various medical conditions such as 'Abscess, Brain', 'Acoustic Neuroma', 'Amputation Transtibial (BK)', 'Appendicitis', 'Arthritis, Juvenile Rheumatoid', and 'Arthritis, Rheumatoid'. A circular logo with a lightning bolt and the text 'QUICK ANSWERS PHYSIOTHERAPY' is also visible.

App:

The screenshot shows a mobile app search results page. The search query is 'Quick answers', resulting in 1,922 results. The results are filtered to show books. The top three results are: 'Quick Answers: Pharmacy' by Lauren K. Roller, Laura Baumgartner, and Shane P. Desselle; 'Quick Answers: Physiotherapy' by Eric Shamus; and 'Quick Answers Surgery' by Gerard M. Doherty. Each result includes a book icon, the title, author name, and the 'Quick Answers Physiotherapy' logo.

[Return to Table of Contents](#)

Infographics

Customers can use infographics for patient use and share patient education handouts with patients. They can also add a logo to those handouts and add a customized message.

Browser:

The screenshot shows the Access Medicine website interface. The top navigation bar includes 'Review Questions', 'Cases', 'Video & Audio', 'Study Tools' (highlighted with a red box), and 'Books'. Below the navigation bar, the user is greeted with 'Welcome, Lauren!' and 'Access Provided by: McGraw Hill'. The main content area is titled 'The Infographic Guide to Medicine: Cardiology' and features a search bar. Below the search bar, there are four infographic cards for 'Angina Pectoris', 'Aortic Dissection', 'Aortic Regurgitation', and 'Aortic Stenosis'. Each card provides a structured overview of the condition, including etiology, clinical presentation, diagnosis, and treatment.

App:

Search any topic and filter by "Infographic"

The screenshot shows the 'Filter results' menu in the app. The menu lists various content types: Audio/Video, Book, Book chapter, Case, Chapter section, Image/Figure, and Infographic. The 'Infographic' filter is selected, indicated by a checkmark. At the bottom of the menu, there are two buttons: 'Clear All' and 'Apply Filters' (highlighted with a red box).

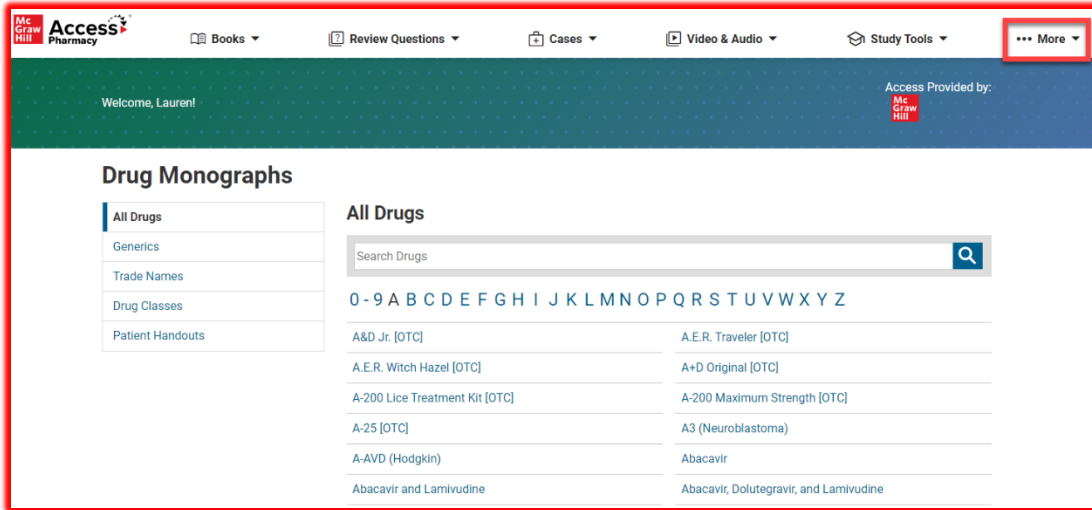

[Return to Table of Contents](#)

Drugs

Look up dosing, indications, and adverse reactions quickly for generic and brand-name drugs, with printable patient handouts presented in English and Spanish.

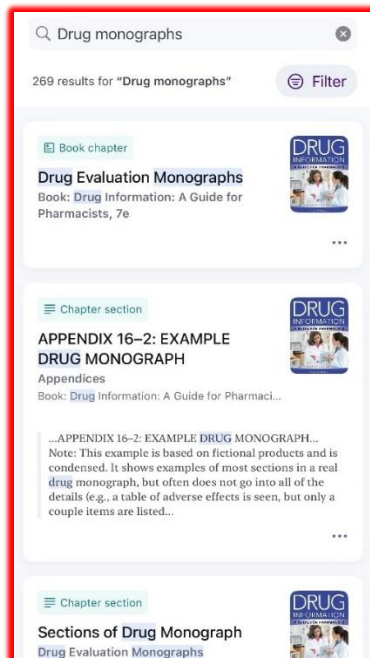

The Drug Monographs are the same for all verticals. They are updated on an autofeed and each have an updated date and reference at the bottom of the page.

Browser:

The screenshot shows the Access Pharmacy website interface. At the top, there is a navigation bar with the Access Pharmacy logo and several menu items: Books, Review Questions, Cases, Video & Audio, Study Tools, and a 'More' dropdown menu. Below the navigation bar, a green banner displays 'Welcome, Laurent!' and 'Access Provided by: McGraw Hill'. The main content area is titled 'Drug Monographs' and features a sidebar with navigation options: All Drugs (selected), Generics, Trade Names, Drug Classes, and Patient Handouts. The main content area is titled 'All Drugs' and includes a search bar labeled 'Search Drugs' with a magnifying glass icon. Below the search bar is an alphabetical index from 0 to Z. A grid of drug names is displayed, including A&D Jr. [OTC], A.E.R. Witch Hazel [OTC], A-200 Lice Treatment Kit [OTC], A-25 [OTC], A-AVD (Hodgkin), Abacavir and Lamivudine, A.E.R. Traveler [OTC], A+D Original [OTC], A-200 Maximum Strength [OTC], A3 (Neuroblastoma), Abacavir, and Abacavir, Dolutegravir, and Lamivudine.

App:

The screenshot shows the Access Pharmacy mobile app interface. At the top, there is a search bar with the text 'Drug monographs' and a magnifying glass icon. Below the search bar, it displays '269 results for "Drug monographs"' and a 'Filter' button. The search results are listed in a vertical scroll view. The first result is a 'Book chapter' titled 'Drug Evaluation Monographs' from the book 'Drug Information: A Guide for Pharmacists, 7e'. The second result is a 'Chapter section' titled 'APPENDIX 16-2: EXAMPLE DRUG MONOGRAPH' from the same book. The third result is another 'Chapter section' titled 'Sections of Drug Monograph' from the same book. Each result includes a small thumbnail image of the book cover.

You can receive education news in your inbox regarding the latest industry updates, recently published editions, online access to premium products, exclusive downloads and more! You can sign up for exclusive product updates here: https://learn.mheducation.com/sign-up-2022.html?utm_source=marketo&utm_medium=email&utm_campaign=int_all-rn-all-all-reactivate&utm_content=em1

You can follow channels on our Access User Center: <https://www.accessusercenter.com/>

You can view updates in the Books tab of the Access site:
<https://accessmedicine.mhmedical.com/books.aspx?view=updates>

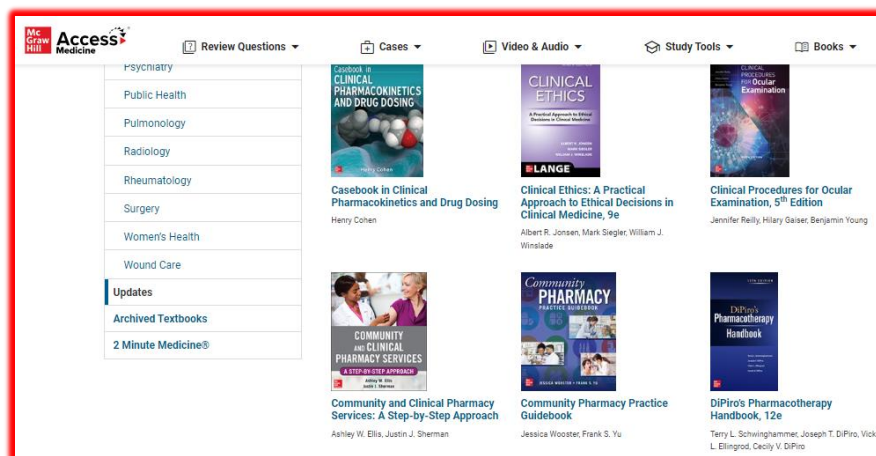

You can view newly published or soon-to-be-published MH Medical titles by visiting this link:
https://www.mhprofessional.com/medical?dir=desc&order=publication_date&p=1

Updates and new editions are included automatically at no additional charge for the subscribers of the Access vertical. In addition to the main use of the Access verticals as databases, you can use direct links to the eBooks in the Access verticals to which you subscribe and include them in your catalogue, use them as direct links on the website, etc.

Chapters are periodically updated with new content.

The “Updates” link under “Books” are “external” updates and they are not updates to the book chapters themselves. These updates are most likely not included in the print version, but they may be included in a new edition of a print book.

The content for updates are only the titles displayed in Books→Updates as shown below.

Editors decide which titles will have external updates. Again, these are not updates to the book chapters, but external/supplementary information to the book and related chapters.

Some of these updates are related to the certain editions and not necessarily the most recent edition.

More About the Access Profile

Once connected to your institution (try your library's A-Z list of databases!), you can create or log in to your Access profile, which then provides remote access to our site for 90 days and offers additional personalized features.

If you do not have an Access profile, you can create one while connected to your institution. Here is a link to additional information about the Access profile, including directions for creating one:
https://www.accessusercenter.com/documents/access-profile-flyer?channel_id=access-app

The Access profile enables users to perform the following actions:

- Gain remote access to your subscribed site(s) using just your Access profile credentials. No extra logins or VPNs required.
- Access Self-Assessment to create and save practice tests
- Save chapters, cases, videos, images and tables to your Favorites
- View recently viewed content
- Download multiple images directly to PowerPoint
- Log in to gain and track CME credits

McGraw Hill Access

Learning, your way.

McGraw Hill Access[®] is a personalized interactive learning solution where users can search vetted and trusted medical and allied health content across a variety of mediums that best fit their learning needs, including

- ▶ Video
- ▶ Podcasts
- ▶ Images
- ▶ Infographics
- ▶ Textbooks
- ▶ Cases
- ▶ Q&A

By creating a free Access profile, you can:

- ▶ View content anytime, anywhere via the app or via the web.
- ▶ Favorite content to revisit later, such as videos, images, tables, chapters, podcasts, and more.
- ▶ Create collections, making it easier and quicker to find important and timely resources.
- ▶ Browse recently viewed content.
- ▶ Access to exclusive content, such as cases and Q&A, that you can manage from your profile.
- ▶ Opt-in and manage communications about new content and product updates.
- ▶ Download multiple images to slides with automatically populating citations.

Create your profile in 3 easy steps:

1. Go to mhmedical.com. You must be on-site at your institution or connect through your institution's VPN or library website.
2. Click on your institution's name in the upper right-hand corner of any page. Once there, click on "Create a Free Access Profile."
3. In the pop-up window, click "Create a Free Access Profile." Complete the registration form and select "Create Profile."

Congratulations! You are ready to enjoy the benefits of an Access profile.

To keep your Access profile active, you must sign in every 90 days while either on-site or through your institution's VPN or library website.

mhmedical.com

McGraw Hill

ACM108 - ©2021 McGraw Hill LLC. All Rights Reserved.

With an Access Profile you may:

- View Access content anytime, anywhere via the new Access App (see instruction below on downloading the app) or via the web.
- Favorite content to revisit later, such as videos, images, tables, chapters, podcasts, and more.
- Create your own personal Collections (folders), making it easier and quicker to find important and timely resources.
- Browse your recently viewed content.
- Access and track your progress through cases and Q&A, that you can manage from your profile.
- Opt-in and manage communications about new content and product updates.
- Download multiple images to slides with automatically populating citations.
- Use the same Access Profile across all your institution's subscriptions to McGraw Hill's Access products (at Ochsner Medical Library: AccessMedicine, AccessAnesthesiology, AccessObGyn, and AccessSurgery).
- Access your content on the go via your mobile device or tablet with the new Access App. See instructions below to download. Once downloaded, you should sign in with your Access Profile account information.

How to Set up Your Free Access Profile Account in 3 Easy Steps

1. Go to www.mhmedical.com. You must be onsite at your institution or connected through your institution's VPN or library website.
2. Click on your institution's name in the upper right-hand corner of any page at Mhmedical.com such as <https://accessmedicine.mhmedical.com/>. Once there, click on "Create a Free Access Profile."
3. In the pop-up window, click "Create a Free Access Profile." Complete the registration form and select "Create Profile." Make note of your username and password for future reference. An important note: To keep your Access profile active, you must sign in every 90 days while either on-site or through your institution's VPN or library website.

[More About the Access App](#)

Download and sign in to the new Access App with your Access Profile Account

1. Download our brand-new Access app available here on the Apple App Store and the Google Play store.
2. Sign into the Access App with your Access Profile. If you do not yet have an Access Profile, you can create one on the App. However, it's recommended that you first create your Access Profile outside of the app (see the above instructions).

Benefits of the Access App from McGraw Hill

- Access the content you need when and where you need it via your mobile device or tablet. (We just added the tablet compatibility)
- Search within content and refine by content type so you can personalize your learning experience. The app creates a much more personalized approach to the Access content.
- Favorite content to revisit later, such as videos, images, tables, chapters, podcasts, and more.
- Create collections, making it easier and quicker to find important and timely resources.
- Browse recently viewed content and curated recommendations on your personal dashboard.
- Sync your favorites and collections between the app and the web through your Access Profile.
- Explore content across all Access sites your institution subscribes to in one place (at Ochsner Medical Library: AccessMedicine, AccessAnesthesiology, AccessObGyn, and AccessSurgery).

Quick Access App Video Tutorials linked below:

- Setup the Access app
- Search in the Access app
- An overview of the content in the Access app (in late August this will include cases and self-assessment questions.
- Personalize your content
- Collect and save content in the Library

[More About Cases](#)

Cases help medical students better understand and evaluate real world experiences by offering questions to frame the case and the approach to the patient.

You need to be logged in to your Access profile to track your progress while reviewing cases and taking associated questions. The Access profile also allows you to access the Access mobile app, bookmark, and other features.

Case Files do not appear in COUNTER reports because they are not set up the same way as books in their database. Therefore, Case Files Collection usage statistics are only available through the "Activity Reports" section. The Activity Reports include a detailed listing of usage by product and resource. Types of activity include searches and content access. Content Access encompasses all non-search activity on the site, including search result clicks, book chapter expansion, print/email content, enlarge/download image, and video play.

[Return to Cases](#)

[Return to Table of Contents](#)

More About CME

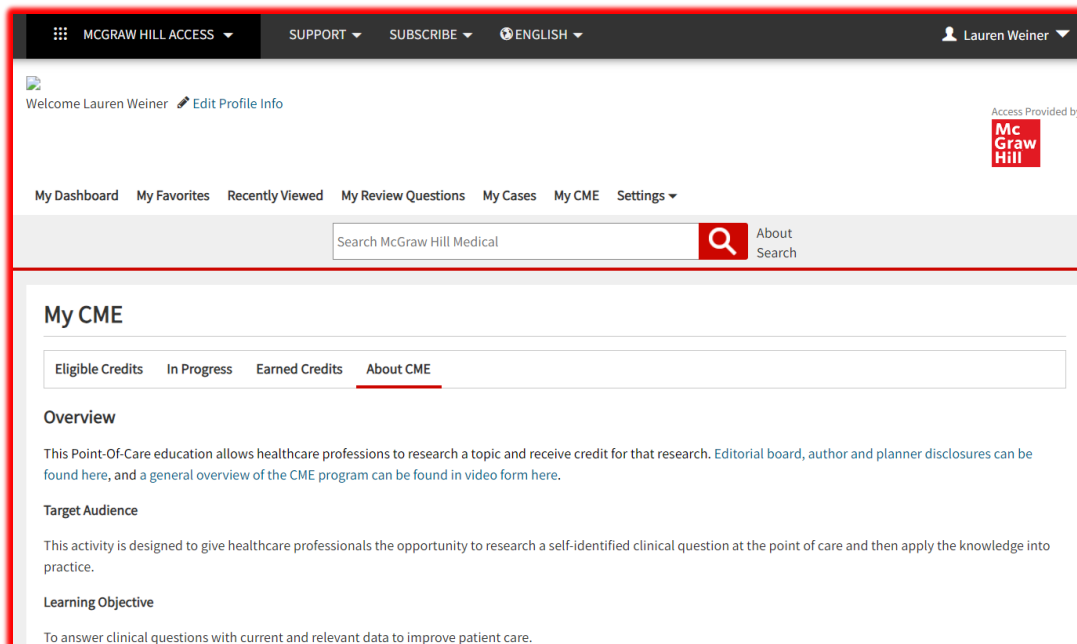

CME is available through many of our Access sites by completing a search topic and an evaluation form. CME is also now available upon completion of certain review questions and cases. Here is a link to additional information: <https://accessmedicine.mhmedical.com/public/aboutCME.aspx>

To complete CME activities, users will need to sign into their Access profile.

Users can filter titles using the CME eligible filter at the top of the library listing of the textbooks. Users can track and organize their activities into clinical queries using the CME ribbon that will appear in the chapter task bar after being on a chapter for at least 15 seconds.

The My CME page in the profile has more information on how to claim CME credits, how activities are accredited, etc. The screenshot below demonstrates these features.

Users can also select from review titles which offer CME eligible content.

[More About 2 Minute Medicine®](#)

Daily Literature Reports by the 2 Minute Medicine® Publishing Group

2 Minute Medicine® (abbreviated 2MM) is an expert physician publishing group founded out of Harvard Medical School that provides concise, curated, and authoritative medical reports of breaking medical literature as well as seminal studies in medicine.

[Return to 2 Minute Medicine®](#)

[Return to Table of Contents](#)

[More About Books](#)

There is no a la carte purchase options for the titles (e-Books) included in the Access verticals.

There is no option to download the full-text of the book all-at-once from the site. This is for a couple of reasons: the first is to protect the copyright of our authors (it's easy for books to get spread around online if they can be downloaded in entirety); the second is that we constantly update text, add supplementary material, etc so accessing the content from the site ensures you will always have the most up-to-date information.

Unfortunately, we are not able to provide online access to copies which have been purchased through separate third-party vendors, such as Amazon. If you purchased it through an institution, such as a university bookstore, then the information for online access should have been provided with your purchase.

We have texts available for purchase on MHPProfessional.com, but they are not PDFs.
<https://www.mhprofessional.com>

However, you can request an electronic desk copy on the page of a particular text.

We currently provide MARC Records for both standard and archived titles that are available on the McGraw Hill Medical sites.

You can download any of the MARC Record files listed [here](#) and they will have metadata for all content available on the corresponding site.

The MARC Records are also made available on the Access User Center.

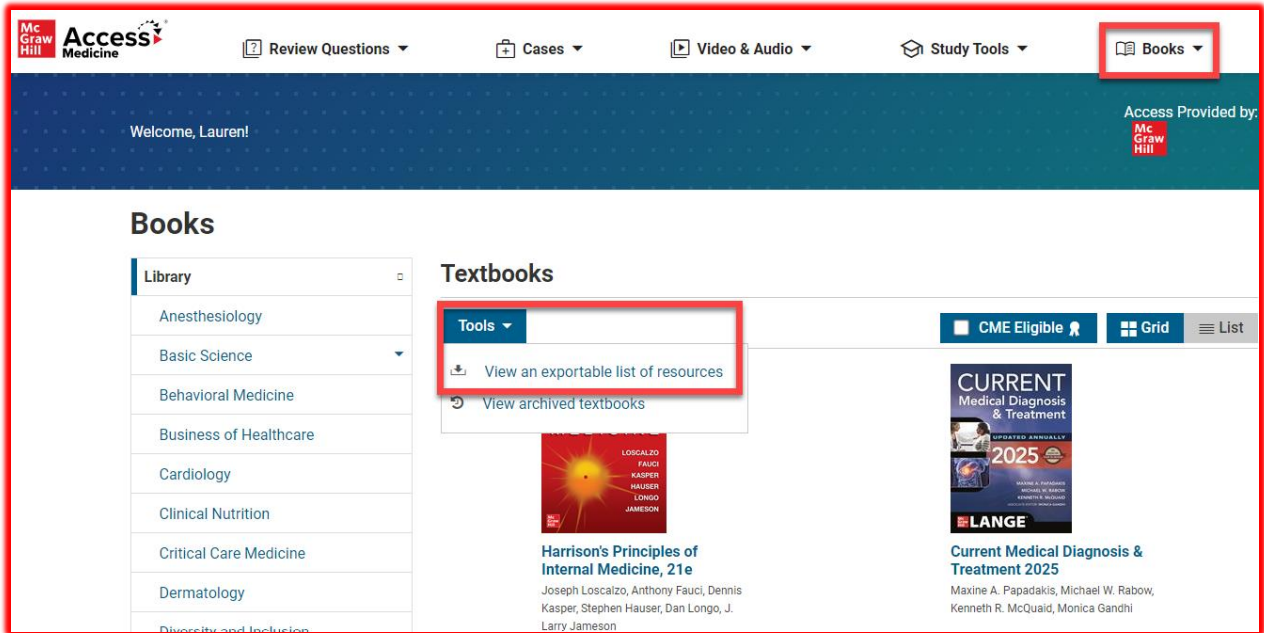

MARC Records VS. Excel Resource List from the Access Sites:

Per an editorial decision, the MARC Records do not contain the Flashcards, Q&A and Case Files content. This content can be obtained from the **exportable list of resources on the Access site**.

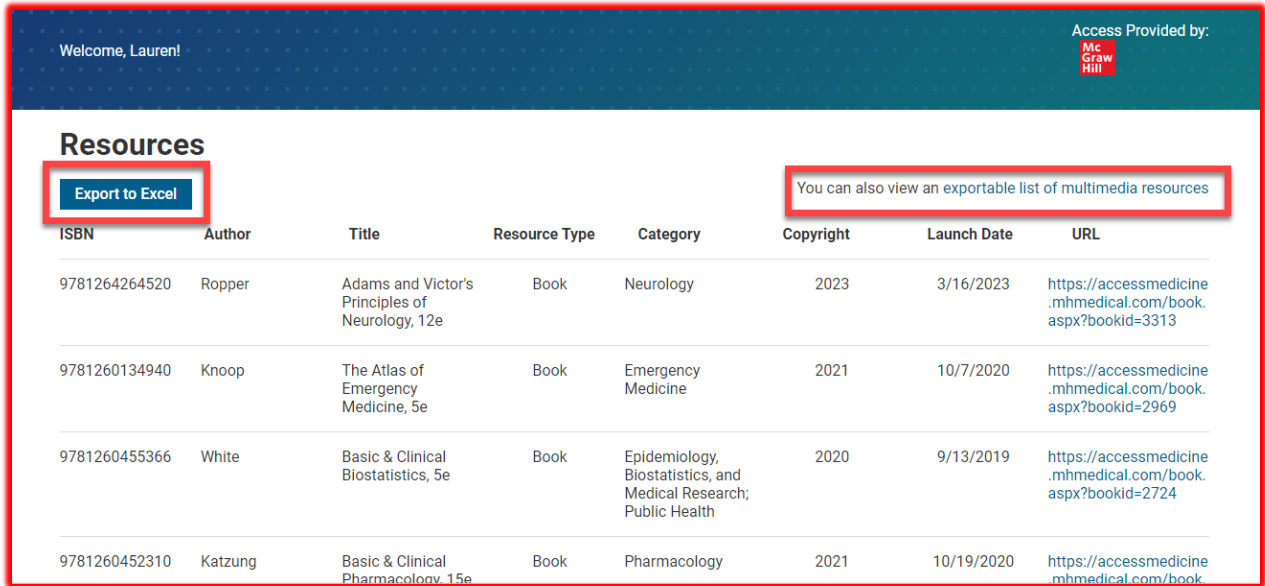

The Case Files are not listed in the MARC records because the case files listed on the AccessMedicine site are abbreviated as opposed to the full case files content that is listed in the MARC Records files for the Case File Collection site.

To view the exportable list of resources from the Access sites:

Select any topic in Books. Then, click on the dropdown for Tools and select “View an exportable list of resources”

You can export these **text** resources to Excel. You can also do the same with multimedia resources.

[Return to Books](#)

[Return to Table of Contents](#)

[More About Review Questions](#)

Faculty do not have the ability to assign self-assessment questions to students. The questions are available on the platform to both faculty and students. However, you can advise them to complete certain amount of questions from a specific title/chapter/section and they can go to complete this through the site. Once completed, they can email you their results.

Return to [Review Questions](#)

[Return to Table of Contents](#)

[More About Multimedia](#)

The Multimedia Item Requests report (IR_M1) reports multimedia requests at the "Item" level, while PR_P1 summarizes platform-level usage by metric type.

The Activity Report, using McGraw Hill's raw statistics, offers additional usage insights not tracked by COUNTER. This proprietary report in SiteManager covers authenticated chapter views, section level views, full figure views, table views, video or audio page views, single quiz question views, case tab views, etcetera. It does not factor sessions or time frame.

Content Access within the Activity Report includes various non-search activities like search result clicks, book chapter expansion, print/email content, enlarge/download image, video play, chapter view, case view, multimedia, play showdown, drug monograph view, share of content, download of figure and table, and content. Landing on a chapter counts as 1; opening each section counts as 1; clicking to open things like figures and tables count as 1; etc.

COUNTER 5 requires 30 seconds on a screen for usage, while Content Access in Activity Reports processes usage upon landing.

For more information on how to pull usage statistics, please visit this link

(<https://nam05.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.accessusercenter.com%2Fpages%2FPulling%2520Usage%2520Statistics&data=01%7C01%7CUserServices%40mheducation.com%7Ced82f42d7b044d8d558608d799f26469%7Cf919b1efc0c347358fca0928ec39d8d5%7C0&sdata=zDwUDdmjS0pt9grHaVy7cmLNx20yVP7rWKO7RbxVYWM%3D&reserved=0>) on the Access User Center.
