

# **Do I need to be connected to my institution's VPN to view the digital websites?**

**Once you have your own personal MyAccess Profile established, you can gain remote access to your subscribed site(s) using just your MyAccess Profile credentials. No extra log-in or VPN is required. Your MyAccess profile must be created while authenticated, and to maintain remote credentialed access you must login to the site within IP range or VPN every 90 days.**

**Please see the FAQ: How/why would I create a MyAccess Profile for registration instructions.**
